

# TAKING CHARGE!

DAN MORRISON, PRESIDENT OF MAJESTIC TRUCKING DISCUSSES THE COMPANY'S NEW FLEET MAINTENANCE CONTROL SYSTEM WITH FOREMAN TED GRAVELY...

TED, NOW THAT YOU'VE GOT THIS NEW CEMP 1 PROGRAM ON LINE... HOW'S IT WORKING?

I'VE NEVER SEEN ANYTHING LIKE IT. MY DAILY ROUTINE IS SIMPLE. EVERY MORNING, I ENTER THE FUEL CONSUMPTION AND ODOMETER READINGS FOR THE ENTIRE FLEET...

THEN, I TAKE THE MECHANICS' AND DRIVERS' COMPLAINTS OF UNSCHEDULED FAILURES AS THEY COME IN...

...AND ENTER THEM INTO THE SYSTEM WITH SIMPLE COMMANDS, LIKE ...

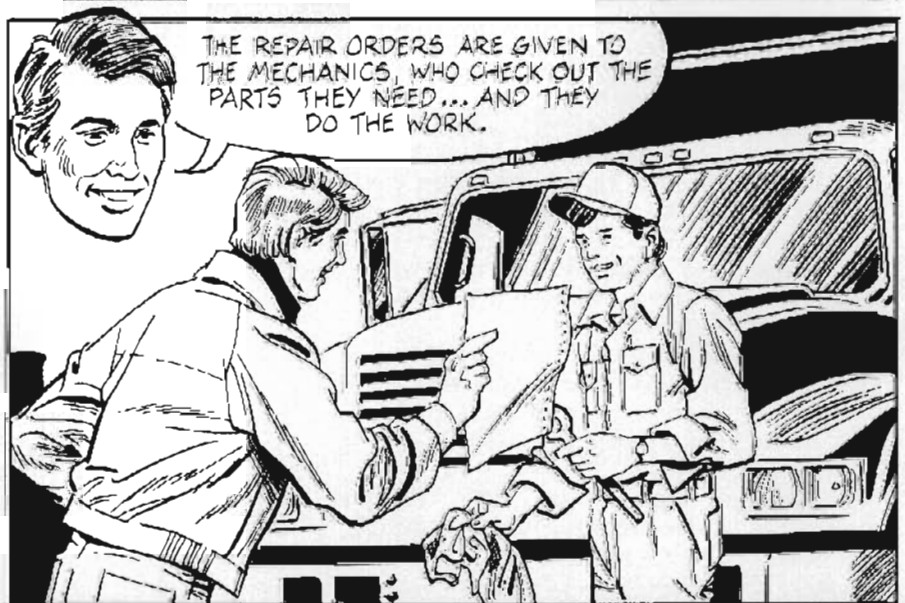

3 = HOLD UNTIL NEXT REPAIR OF VEHICLE  
PRESS RETURN TO CONTINUE

1 = DO NOW & INCLUDE ANY FM THAT'S DUE  
PRESS RETURN TO CONTINUE

2 = DO NOW & ACCELERATE OTHER PM'S  
PRESS RETURN TO CONTINUE

THEN I HIT THE COMMAND KEY JUST ONCE... AND I GET AN INSTANT PRINT-OUT OF TODAY'S REPAIR ORDERS!

THE REPAIR ORDERS ARE GIVEN TO THE MECHANICS, WHO CHECK OUT THE PARTS THEY NEED... AND THEY DO THE WORK.

DURING THE DAY, AS WORK IS FINISHED, I TELL THE SYSTEM HOW LONG EACH TASK TOOK AND THE ACTUAL PARTS USED...

...AND I GO HOME. CEMP1 DOES ALL THE COMPUTATIONS... AND EVERY VEHICLE'S MAINTENANCE IS COMPLETELY CONTROLLED.

AMAZING! WITH THAT KIND OF CONTROL, WE'LL STAY ON PLAN AND KEEP OUR COSTS COMING DOWN!

I'LL BET WE SAVE A BUNDLE... IN UNSCHEDULED COSTS ALONE! NICE JOB, TED!

**NICE JOB, CEMP1!**

**CEMP1**

**Compare!**

Whether your fleet is 20 vehicles or 200,000, CEMP1 is the right system for you.

CEMP1 can be deployed in any computer environment, and it can be accessed from *anywhere* with a path to the Internet. CEMP1 on a Virtual Server from Norse Systems allows your maintenance system to follow your equipment around the world.

Regardless of fleet size, no other system you can buy today offers you more flexibility, is more powerful, more cost effective or simpler to use than CEMP1.

Call Norse Systems today. Let us help you get started towards better fleet control... and dramatically higher profits.
